

ClaimFlow AI

User Guide

How to file and track health-insurance claims, review them as a claims team, and administer the system — in the web portal, its chat assistant, and on WhatsApp.

Version: October 2026 · Applies to the ClaimFlow AI portal and WhatsApp assistant

Contents

1. Getting started
 2. For claimants

 6. Troubleshooting & FAQ
 7. Appendix — Demo accounts (local environment)
-

1. Getting started

1.1 What ClaimFlow does

ClaimFlow AI handles a health-insurance claim from the moment it is filed until it is paid or closed:

- **Claimants** file claims with their medical bills and documents — through the web portal, a chat assistant inside the portal, or WhatsApp — and follow their progress.
- **AI** reads the documents, writes a short case summary, flags anything that looks inconsistent, and suggests which specialist should review the claim.
- **People always decide.** A triage reviewer confirms where the claim goes, and a specialist approves it, denies it, or asks the claimant for more information. Large approvals need a supervisor's sign-off.
- Every step — automated or human — is recorded in an **audit trail**.

1.2 Who uses ClaimFlow

Role	What they do	Main screens
Claimant	Files claims, checks status, answers requests for more information	Claims, Submit a Claim, Policy, chat assistant, WhatsApp
Triage team	Checks each new claim, confirms or changes the AI's suggested reviewer, handles claims that failed validation	Tasks
Adjuster	Reviews routine claims and decides	Tasks
Investigator	Reviews claims with fraud warning signs and decides	Tasks
Legal reviewer	Reviews high-value claims (over \$50,000) and decides	Tasks
Supervisor	Signs off approvals over \$50,000; picks up reviews that were escalated	Tasks
Administrator	Manages policies and staff accounts; can see every task and the audit trail	Policies, Tasks, Audit, staff registration

1.3 Logging in

Open the ClaimFlow portal in your browser and choose **Log in**. Claimants and staff use the same login page.

The image shows the ClaimFlow login page. At the top left is the ClaimFlow logo, and at the top right is a 'Log in' link with a lightbulb icon. The main heading is 'Login', followed by the text 'Claimants and staff both log in here.' Below this are two input fields: 'Email' and 'Password'. A dark blue 'Log in' button is positioned below the password field. At the bottom, there is a link for 'Forgot password?' and a note 'Not a claimant yet? Sign up'.

- Enter your **email** and **password**, then **Log in**.
- **Forgot your password?** Choose *Forgot password?*, enter your email, and you'll receive a **verification code** by email. Enter the code and a new password (at least 8 characters). The code is valid for 10 minutes; after a reset you log in again with the new password.

The image shows the ClaimFlow 'Forgot password' page. At the top left is the ClaimFlow logo, and at the top right is a 'Log in' link with a lightbulb icon. The main heading is 'Forgot password', followed by the text 'Enter your account email and we'll send you a verification code.' Below this is an 'Email' input field. A dark blue 'Send code' button is positioned below the email field. At the bottom, there is a link for 'Back to login'.

1.4 Creating a claimant account

Claimants register themselves with **Sign up**. To prove the account belongs to someone on a policy, you enter:

- your **policy number**,
- the **email address on that policy** (the policyholder's, or a dependent's listed on the policy), and
- a **password** (at least 8 characters).

If the policy number and email don't match the policy records, sign-up is refused. Staff accounts are not created here — an administrator creates them (see 4.2).

ClaimFlow

Log in

Sign up

Claimants only — we verify your policy number and email match a policy on file before creating your account.

Policy number

As the policyholder or a listed dependent on that policy

Email

Password

At least 8 characters

Sign up

Already have an account? [Log in](#)

1.5 Good to know about logins

- **Each browser tab has its own login.** You can be signed in as different users in different tabs — useful for demonstrations and testing.
- A **new tab or a pasted link starts logged out**, and **closing a tab logs that tab out**. "Duplicate tab" copies the current tab's login.
- A login lasts **8 hours**. When it expires you are taken to the login page with *"Your session has expired. Sign in again."*
- If you see *"You were signed out because this tab's sign-in changed. Sign in again."*, the tab's login was changed underneath it; simply log in again.
- **Log out** from the account menu (your initials, top right). This logs out only the current tab.

2. For claimants

2.1 Your claims page

After logging in you land on **Claims**: a summary of your claims and a list you can search and filter by status.

Ask ClaimFlow

Item	Meaning
Total claims / Active claims / Total claimed value / Needs attention	Quick totals. <i>Needs attention</i> counts claims waiting for you to provide information.
Status	Where the claim is (see the table below).
Progress	Three bars: Submitted → In review → Decision.
Assigned to	Which specialist is handling it.

Claim statuses

Status	What it means	What you need to do
Submitted	We've received the claim.	Nothing.
Validating	We're checking it against your policy.	Nothing.
In triage	A reviewer is deciding which specialist should handle it.	Nothing.
Under review	A specialist is reviewing it.	Nothing.
Action needed	The reviewer needs more information from you.	Open the claim and choose Provide info (see 2.4).
Approved	The claim was approved and payment has been triggered.	Nothing.
Denied	The claim was not approved. The reason is shown on the claim.	Read the reason and the denial letter you receive by email.

2.2 Submitting a claim (form)

Choose **Submit a Claim**. The form has five steps; use **Continue** and **Back** to move between them.

Continue

Ask ClaimFlow

Step	What you enter	Tips
1. Policy	Your policy (pre-selected) and the claim type: Outpatient, Inpatient, Pharmacy, Dental, Maternity or Other	Claimants can only file against their own policy.
2. About the incident	Your name, incident date, what happened, and the amount you're claiming	Your email is your account email and can't be changed. The amount can't exceed your policy's coverage. Dates can't be in the future.
3. Diagnosis, procedure & provider	Diagnosis code (ICD-10), procedure code (CPT/HCPCS), date(s) of service, total billed amount, whether you have other insurance, and the provider	These codes are on your bill or discharge summary. Start typing a condition (e.g. <i>fever</i>) to search diagnosis codes. Search the provider by name or NPI — choosing a known provider fills in its details.
4. Documents	At least one supporting document	Medical bills, discharge summaries, prescriptions. PDF, JPG or PNG, up to 10 MB each. Drag and drop or click to browse.
5. Review	Check everything, tick the declaration that the information is true and accurate, then Submit claim	You'll see a reference number such as #3f8a91c2 . Keep it for your records.

2.3 Following a claim

+ AI case summary

+ AI-assessed

The submitted documents (discharge summary and itemized hospital bill from City Care Multi-Specialty Hospital) show treatment and hospitalization for acute dengue fever with thrombocytopenia from August 10 to August 14, 2026, totaling 25,200 INR. This directly contradicts the claimant's stated reason for filing the claim, which is that they were in a car accident and broke their leg. The adjuster should note this significant discrepancy between the medical documentation and the claimant's narrative before deciding on the claim.

⚠ Claimant Identity Mismatch (95% confidence)

— The patient name on the submitted hospital documents is Aarav Sharma (Male, Age 34), which does not match the claimant's name, Amina Al-Farsi.

⚠ Narrative Mismatch (95% confidence)

— The claimant states they filed the claim because they were in a car accident and broke their leg, whereas the structured document data and medical records show treatment and hospitalization for acute dengue fever with thrombocytopenia.

AI RISK REASONING

The claim falls into the High band (60-79) because there are 2 fraud indicators flagged and the case summary describes a clear cross-document and narrative mismatch—specifically, hospital records for dengue fever contradicting the claimant's stated reason of a car accident and broken leg.

Documents (2)

View

Discharge_Summary.pdf

Final_Hospital_Bill.pdf

- **Progress tracker** — Submitted → In review → Decision.
- **Amounts, risk score and fraud indicators** — the AI's assessment, which reviewers use alongside their own judgement.
- **AI case summary** — a short summary of what your documents show.
- **Service & billing, Provider, Claimant & policy, Incident** — what you filed.
- **Review & decision** — who handled it and the outcome.
- **Documents** — every file attached to the claim; choose **View** to preview it.
- **Print** — prints the claim.

You also receive **email updates** when the claim is approved, denied, or needs more information.

2.4 When a claim says "Action needed"

A reviewer has asked for more information. Open the claim: a card shows "A reviewer requested more information on this claim." along with what they need.

1. Choose **Provide info.**
2. Attach the requested documents and, optionally, add a note.
3. Submit. The claim goes back to the **same reviewer**, who then makes a decision.

2.5 Your policy

Policy shows your policy: number, status, coverage amount, premium, effective and expiry dates, and the dependents covered.

← Back

Main menu

Raising a claim in the chat

- Each question shows the right control: buttons for your policy and claim type, a date picker for dates, a search box for diagnosis codes and providers, **Yes / No** buttons, and a **Same day** shortcut for the last date of service.
- Use ← **Back** to go to the previous question, or **Main menu** to cancel and start over.
- At the end you see a **summary of all your answers**, each with an **Edit** link. Tick the declaration and choose **Submit claim**.
- If something can't be accepted (for example, an amount above your coverage), the chat tells you why and asks just that question again.
- Your answers survive a page reload or moving to another page, but **attached files don't** — after a reload you'll be asked to attach them again.

2.7 Using WhatsApp

You can also use ClaimFlow on WhatsApp, if your mobile number is on your policy record (as policyholder or dependent).

- Send **hi** (or **menu**) to the ClaimFlow WhatsApp number. You'll get a menu: **Check claim status**, **Check policy status**, **Raise a claim**.
- Check claim status** lists your recent claims — whether you filed them on WhatsApp or in the portal. Tap one for details.
- Raise a claim** asks the same questions as the portal form, one at a time:
 - Tap your policy and claim type from the lists; tap **Yes/No** where offered.
 - Dates can be typed as `2026-10-03` , `03/10/2026` , `3 Oct 2026` , or `today` / `yesterday` .

- At the end, send photos or PDFs of your documents, then type **done**.
 - If something needs correcting, the bot asks only that question again.
4. Useful words at any time: **menu** (back to the main menu) and **cancel** (stop the current claim). Every question also has a **Main menu** button.

Status updates are sent **by email**, not WhatsApp. If the bot says your number isn't linked to a policy, ask your insurer to add your number to your policy.

3. For the claims team (reviewers)

3.1 Your task queue

Staff land on **Claims**, with **Tasks** in the top bar showing how many tasks are waiting. **Tasks** lists the open tasks for **your role only** — triage sees triage tasks, adjusters see adjuster reviews, and so on. Administrators see every task.

ClaimFlow Policies Claims **Tasks (1)** Audit

Tasks

Open review tasks for your role (trriage-team). Stock Tasklist at localhost:8080/tasklist still works too.

POLICY NO.	NAME	AMOUNT	DESCRIPTION
POL-100013 Triage Review	Aarav Sharma	\$500.00	The submitted document is entirely blank and contains no billing, clin...

Open a task to work on it. Every task page shows:

- **Case summary** — the AI's summary, the incident, risk score (0–100), number of fraud indicators, and the AI-suggested role.
- **Claim details** — claim type, dates, diagnosis and procedure codes, amounts, other coverage, provider, and how it was filed (Portal or WhatsApp).
- **Documents** — preview each document with **View**.
- **View full submission** → — opens the full claim page.
- **Review** — where you act.

3.2 Claiming a task

Before you can act, choose **Claim task**. The task is now assigned to you ("Claimed by you") and nobody else can complete it. If you can't finish it, choose **Unclaim** to return it to the queue.

3.3 Triage Review

Every claim that passes validation comes to triage first. The AI has suggested a reviewer; **you confirm or change it**.

Note for reviewer (optional)

Anything the adjuster/investigator/legal reviewer should know before they pick this up.

Submit

Field

Options

Action

Route for specialist review — send it to a reviewer; Reject claim — deny it now (a denial reason is required)

Field	Options
Confirmed role	Adjuster, Investigator or Legal — the AI's suggestion is pre-selected; choose another to override it (overrides are recorded)
Note for reviewer	Optional — anything the next reviewer should know

Choose **Submit**.

How the AI suggests a reviewer (first matching rule wins):

Situation	Suggested reviewer
Claim amount over \$50,000	Legal
At least one fraud indicator	Investigator
Policy started 14 days or less before the incident	Investigator
Claimant filed 3 or more claims in the last 12 months	Investigator
Risk score 40 or higher	Adjuster
Anything else	Adjuster

3.4 Validation Exception Review

When a claim fails automatic checks — no active policy covering the incident date, the claimant isn't the policyholder or a dependent, another claim on the same policy is still open, or required information is missing — it comes to the triage team as a **Validation Exception Review**. The task shows the claim, its details and documents; the result of each check is recorded in the claim's **audit trail** (step *Validated*).

Resolution	Effect
Approve	Override the failed check(s); the claim continues to AI review and triage
Reject	Deny the claim (a denial reason is required); the claimant receives a denial letter

3.5 Adjuster, Investigator, Legal and Supervisor Review

The confirmed reviewer makes the decision:

Decision	What you enter	What happens next
Approve	—	Payment is triggered and the claimant is emailed. Over \$50,000, a supervisor must sign off first.
Deny	Denial reason	A denial letter is drafted and emailed to the claimant.
More info needed	Reason more info is needed — e.g. "Itemised bill for 3 Oct visit"	The claimant is emailed, the claim shows <i>Action needed</i> , and when they respond the task comes back to you .

3.6 Supervisor Sign-off

Approvals over **\$50,000** need a second approval. Supervisors see a **Supervisor Sign-off** task; review the claim and choose **Sign off**.

3.7 Response times and escalation

Each review step has a deadline of **24 business hours** (weekends and US federal holidays don't count). If a task isn't completed in time:

Task	If the deadline passes
Validation Exception Review	The claim is automatically rejected
Triage Review	The AI's suggested reviewer is accepted automatically
Adjuster Review	Escalated to an investigator
Investigator Review	Escalated to legal
Legal Review	Escalated to a supervisor
Supervisor Review	No automatic action

You also receive an **email** when a new task arrives for your role.

3.8 Claims list and audit trail

Claims shows all claims; search by name or policy number and filter by status. Open a claim to see its full details.

POL-100009	Rania Saleh	Cancelled	Jan 1, 2025	Dec 31, 2025	\$1,200.00	\$25,000.00	×

- **+ Add policy** — enter the policy number, policyholder name, email and (optionally) phone, status (Active, Lapsed or Cancelled), effective and expiry dates, premium and coverage amount. You can add **dependents** (name, email, optional phone, relationship: spouse, child or other) — dependents can sign up and file claims on the policy.
- To let someone use **WhatsApp**, record their mobile number on the policy (policyholder) or on their dependent entry.
- ✕ deletes a policy. Policies that already have claims can't be deleted.
- Open a policy to see its details and dependents.

4.2 Creating staff accounts

Staff accounts are created by administrators: open the account menu (your initials, top right) and choose **Register new user**. Enter the email, a password and the **role**: Admin, Triage team, Adjuster, Investigator, Legal reviewer or Supervisor. The role decides which tasks the person sees.

ClaimFlow Policies Claims Tasks (2) Audit

Register a new user
Admin only — creates a staff account with the role you choose below.

Email

Password
At least 8 characters

Role

Create account

4.3 Process monitoring

Administrators can also open the process engine's own tools (default `http://localhost:8080`, local environment):

- **Operate** — every claim's process, its current step, and any technical errors ("incidents") to resolve.
- **Tasklist** — the engine's own task list; ClaimFlow's **Tasks** page is the recommended way to work.

5. What happens after a claim is submitted

Stage	What happens	Who
1. Intake	The claim and documents are saved and the claim gets a reference number.	System
2. Validation	Checked against the policy: active on the incident date, claimant authorised, no other open claim on the policy, nothing missing. Failures go to Validation Exception Review.	System → Triage team
3. AI review	Documents are read, a case summary is written, inconsistencies are flagged as fraud indicators, and a 0–100 risk score is given with its reasoning.	AI
4. Routing suggestion	The AI suggests Adjuster, Investigator or Legal (see 3.3).	AI
5. Triage	A person confirms or changes the suggested reviewer, or rejects the claim.	Triage team
6. Decision	The reviewer approves, denies, or asks the claimant for more information.	Adjuster / Investigator / Legal / Supervisor
7. Sign-off	Approvals over \$50,000 are signed off by a supervisor.	Supervisor
8. Outcome	Approved: payment is triggered. Denied: a denial letter is drafted. The claimant is emailed and the case is closed.	System + AI

Every stage is recorded in the audit trail.

6. Troubleshooting & FAQ

Question	Answer
I was sent back to the login page.	Your login expired (8 hours), or you opened the page in a new tab — each tab has its own login. Log in again.
"You were signed out because this tab's sign-in changed."	The tab's login changed while it was open. Log in again in that tab.
My claim was refused when I submitted it.	The message says why — commonly the amount is above your policy's coverage, a code is in the wrong format, or no document is attached. Correct it and submit again.
What format are the codes in?	Diagnosis (ICD-10): a letter, two characters, optionally a dot and more, e.g. E11.9 . Procedure: 5 digits (CPT, e.g. 99213) or a letter and 4 digits (HCPCS). Provider NPI: 10 digits. All are printed on your bill.
Which files can I upload?	PDF, JPG or PNG, up to 10 MB each.
WhatsApp says my number isn't linked.	Your mobile number must be on your policy (as policyholder or dependent). Ask your insurer to add it.
I don't see a claim on WhatsApp.	WhatsApp shows claims filed by you (by phone or under your email). Claims filed by another person on the same policy aren't shown.
I don't see a task I expected.	The Tasks page only shows tasks for your role, and a task claimed by someone else can only be completed by them.
Who receives emails in the demo environment?	In the local demo environment all emails are redirected to a single test inbox, with the intended recipient shown in the subject line.

7. Appendix — Demo accounts (local environment)

These accounts exist only in a local demo environment created with the seeding script. All use the password **claimflow123**.

Role	Email
Administrator	admin1@claimflow.test
Triage team	triage1@claimflow.test
Adjuster	adjuster1@claimflow.test
Investigator	investigator1@claimflow.test
Legal reviewer	legal1@claimflow.test
Supervisor	supervisor1@claimflow.test
Claimant (POL-100001)	amina.al-farsi@example.com
Claimant (POL-100004)	youssef.nasser@example.com

Tip for demonstrations: because each tab has its own login, you can open one tab per role and walk a claim through the whole process side by side.
